Dnipro, Ukraine

UDC 602.4:622'17:622.88(062)

Applied Biotechnology in Mining: Proceedings of the International Conference (Dnipro, April 25-27, 2018). – Dnipro: National Technical University “Dnipro Polytechnic”, – 2018. – 91 p.

ISBN

The book contains abstracts on innovative approaches for biomining technologies including both phytomining and microbial technologies in mining, as well as environmental biotechnology and other environmental assessment technologies.

The authors of the published materials are fully responsible for the selection, accuracy, reliability of the data, facts, quotations and other information.

Edited by Prof. Dr. Hermann Heilmeier, Dr. Iryna Klimkina, Prof. Dr. Oleksandr Kovrov and others.

The Proceedings Book has been published under DAAD grant support in the frame of Program “Professionally Related Partnership with Universities of Developing Countries” and within the project “***Biotechnology in Mining – Integration of New Technologies into Educational Practice***” (2015 – 2018) due to cooperation between Technische Universität Bergakademie Freiberg (TU BAF), Germany, and National Technical University “Dnipro Polytechnic” (former National Mining University), Dnipro, Ukraine.

Scientific Board

Rector **Gennadiy PIVNYAK**, Academician of the National Academy of Science of Ukraine, National Technical University “Dnipro Polytechnic”(NTU DP), Ukraine;

Prof. Dr. **Oleksandr BESHITA**, Vice-Rector for Research, NTU DP;

Prof. Dr. **Oleksandr SHASHENKO**, Vice-Rector for International Affairs, NTU DP;

Prof. Dr. Dr. h.c. mult. **Carsten DREBENSTEDT**, Director of the Institute of Mining – Surface Mining, Technische Universität Bergakademie Freiberg (TU BAF), Germany;

Prof. Dr. **Michael SCHLÖMANN**, Director of the Institute of Biosciences, Head of the Scientific Group on Environmental Microbiology, TU BAF;

Prof. Dr. **Hermann HEILMEIER**, Head of the Scientific Group on Biology & Ecology at the Institute of Biosciences, TU BAF;

Patricio Martínez BELLANGE, Director of Hydrometallurgical and Biotechnological Processes in CodelcoTech, Huechuraba, Chile;

Prof. Dr. **Volodymyr BUSYLO**, Dean of the Mining Faculty, NTU DP;

Prof. Dr. **Borys SOBKO**, Head of the Department of Open Cast Mining, NTU DP;

Prof. Dr. **Dmytro RUDAKOV**, Head of the Department of Hydrogeology and Engineering Geology, NTU DP;

Prof. **Artem PAVLYCHENKO**, Head of the Department of Ecology and Environmental Technologies, NTU DP;

Prof. **Oleksandr KOVROV**, Department of Ecology and Environmental Technologies, NTU DP;

Dr. **Iryna KLIMKINA**, Department of Ecology and Environmental Technologies, NTU DP;

Dr. **Olexii LOZHNIKOV**, Department of Open Cast Mining, NTU DP;

Dr. **Andrii CHEREP**, Department of Applied Economy, NTU DP;

Prof. Dr. **Mykola KHARYTONOV**, Director of the Center of Nature Management, Dnipropetrovsk State Agrarian and Economic University, Ukraine;

Dr. **Andrey SMIRNOV**, Coal Production Director, DTEK Energy, Ukraine;

Iryna VERBITSKA, Head of the Department on Environmental Safety, DTEK, Ukraine;

Vladislav VERNIGORA, Head of the Department of Ecology, PJSC “DTEK Pavlogradugol”;

Victor LOTOUS, Chairman of Managing Board, FERREXPO POLTAVA MINING, Ukraine;

Dmytro VINIVITIN, Deputy Head of Technical Department, FERREXPO POLTAVA MINING, Ukraine

Organizing Committee

Prof. Dr. **Hermann HEILMEIER**, TU BAF, Germany;

Prof. Dr. **Michael SCHLÖMANN**, TU BAF, Germany;

Prof. Dr. **Borys SOBKO**, NTU DP, Ukraine;

Prof. **Oleksandr KOVROV**, NTU DP, Ukraine;

Dr. **Iryna KLIMKINA**, NTU DP, Ukraine;

Dr. **Olexii LOZHNIKOV**, NTU DP, Ukraine;

Dmytro VINIVITIN, FERREXPO POLTAVA MINING, Ukraine

CONTENT

Session 1. MICROBIAL TECHNOLOGIES IN MINING.....	15
<i>Michael Schlömann.</i> INNOVATIVE ECO-EFFICIENT BIOHYDROMETALLURGICAL PROCESSES FOR THE RECOVERY OF STRATEGIC AND RARE METALS FROM PRIMARY AND SECONDARY RESOURCES.....	16
<i>Sophie Ullrich, Martin Mühling, David Holmes and Michael Schlömann.</i> A NEW “FERROVUM” SPECIES IN A SCHWERTMANNITE-PRODUCING PLANT FOR MINE WATER TREATMENT.....	17
<i>Patricia Piña and Patricio Martinez.</i> BBS/BBF ENCAPSULATED MICROORGANISMS TECHNOLOGY FOR SOLID INOCULATION, THE NEXT STEP TO NOT USE WATER IN BIOLEACHING PROCESSES WITH HIGH PERFORMANCE.....	18
<i>Ringo Schwabe, Gerardo Retamal-Morales, Arturo Bravo, Manuel-Jose Humeres, Dirk Tischler, Michael Schlömann, Gloria Levican and Oliver Wiche.</i> SIDEROPHORES FOR SELECTIVE SOLID PHASE EXTRACTION OF STRATEGIC ELEMENTS.....	19
<i>Sabine Kutschke, Rahel Bertheau, Stefan Dirlich and Katrin Pollmann.</i> TEST OF MICROBIAL TRANSFORMATION OF FLOTATION TAILINGS TO CONSTRUCTION MATERIAL.....	20
<i>Sylvi Schrader, Sabine Kutschke, Martin Rudolph and Katrin Pollmann.</i> AMPHIPHILIC SIDEROPHORE MARINOBACTIN FOR FROTH FLOTATION PROCESS.....	21
<i>Nabil Charchar, Laid Bouchaala, Hani Bouyahmed, Abd El-fatteh Gherib and Amel Lehout.</i> MICROBIAL CHARACTERIZATION OF ABANDONED MINING AREA OF SIDI KAMBER NORTH-EAST OF ALGERIA.....	22
<i>Danylo Lysenko, Vadym Pecherskyi, Fabian Giebner and Michael Schlömann.</i> LEACHING OF SYNTHETIC GaAs- AND INDIUM-BEARING SPHALERITE ORE WITH HELP OF “REICHE ZECHÉ” MINE WATER.....	23
<i>Iryna Blaida, Tetiana Vasylieva, Larysa Sliusarenko and Volodymyr Ivanytsia.</i> THE GERMANIUM EXTRACTION FROM TECHNOGENIC RAW MATERIALS BY MICROBIOLOGICAL METHODS.....	24
Session 2. PHYTOTECHNOLOGIES IN MINING.....	25
<i>Hermann Heilmeyer and Oliver Wiche.</i> THE PCA OF PHYTOMINING: PRINCIPLES, CHALLENGES AND ADVANCES.....	26
<i>Oliver Wiche, Christin Moschner, Balázs Szekely and Hermann Heilmeyer.</i> BIOAVAILABILITY OF ELEMENTS FOR EFFECTIVE PHYTOREMEDIATION AND PHYTOMINING: THE ROLE OF RHIZOSPHERE PROCESSES.....	27
<i>Ivan Korshykov, Oleh Krasnoshtan, Mykola Baranets, Olha Krasova and Lyudmyla Boyko.</i> USING PLANTS FOR GREENING OF TAILING PONDS OF IRON ORE COMBINES OF KRYVYI RIH AREA.....	28
<i>Oliver Wiche, Christin Moschner, Ringo Schwabe and Ulf Feuerstein.</i> GENOTYPIC VARIATION IN THE ACCUMULATION OF RARE EARTH ELEMENTS (REE) IN <i>PHALARIS ARUNDINACEA</i> L.....	29
<i>Mykola Kharytonov, Mykhailo Babenko, Nadiia Martynova, Iryna Klimkina and Hermann Heilmeyer.</i> TESTING OF PHYTOMELIORATED DARK – GRAY SCHIST CLAY PROFILE WITH <i>MISCANTHUS</i>	30

<i>Svetlana Garmash and Nikita Semenov.</i> BIOUTILIZATION OF WASTE AGROINDUSTRIAL COMPLEX FOR RECEIVING BIOGAS.....	66
<i>Ilya Tkach and Artem Pavlychenko.</i> JUSTIFICATION OF MIXTURE COMPOSITION FOR RECLAMATION OF THE LANDS DISTURBED AS A RESULT OF UNDERGROUND COAL MINING.....	67
<i>Sergii Digtar, Mykhailo Yelizarov and Tetyana Kozlovska.</i> PROSPECTS FOR OBTAINING VALUABLE PRODUCTS FROM CYANOBACTERIA BIOMASS.....	68
<i>Svitlana Lysytska, Volodymyr Gerasimenko, Vasyl Kravets and Tatiana Kholodenko.</i> RESEARCH OF SECONDARY BIOMATERIALS AS POTENTIAL ENERGY SOURCE FOR MINING LABOUR.....	69
<i>Vladymyr Sytar, Vladymyr Anisimov, Natali Mitina and Svetlana Garmash.</i> BIOEDAGRADATION OF THERMOPLASTIC POLYURETHANES.....	70
<i>Polina Chirva, Iryna Pleshkova and Marina Shamray.</i> ALTERNATIVE ENERGY SOURCES: ELECTRIC CURRENT FROM LIVING PLANTS.....	71
<i>Olena Kharlamova, Volodymyr Shmandiy and Tetiana Rigas.</i> BIOTECHNOLOGICAL ASPECTS USE OF WASTE IN ECOLOGICAL SAFETY.....	72
<i>Katerina Kalinina and Oleksandr Kovrov.</i> THE INFLUENCE OF MERCURY POLLUTION ON THE GROWTH OF BIO-INDICATOR PLANTS.....	73
<i>Ksenia Tsunik and Oleksandr Kovrov.</i> INVESTIGATION OF PHYTOINDICATION EFFECTS DUE TO CADMIUM CONTAMINATION.....	74
<i>Yaroslav Romanko, Iryna Reshetnyak, Elena Matukhno and Angelica Meshkova.</i> INFLUENCE OF GREEN PLANTS ON DISTRIBUTION OF SOLAR RADIATION UNDER CONDITIONS OF URBAN BUILDING.....	75
<i>Kateryna Zharan and Jan C. Bongaerts.</i> THEORETICAL MODEL INTEGRATING OF RENEWABLE ENERGY INTO THE MINING INDUSTRY.....	76
Session 4. OTHER ENVIRONMENTAL TECHNOLOGIES.....	77
<i>Mykola Kharytonov and Galyna Yevgrashkyna.</i> ENVIRONMENT ASSESSMENT AND MODELLING OF SALTS TRANSFER IN FOUR LAND RESTORATION SCHEMES IN THE COAL MINING REGION.....	78
<i>Iryna Kochmar, Vasyl Karabyn and Kateryna Stepova.</i> COPPER IN COAL MINING PRODUCTS OF VIZEYSKA LVIV-VOLYN COAL BASIN MINE: ECOLOGICAL, GEOCHEMICAL AND TOXICOLOGICAL ASPECTS.....	79
<i>Tatiana Seredych and Iryna Klimkina.</i> NEUTRALIZATION EFFECT OF THE FLY ASH AND COAL DUMP WASTES.....	80
<i>Mohamed Azzaoui, Benchohra Maamar, Leila Soudani, Abassia Ayache and Mohamed Berreyah.</i> CHRONOLOGICAL STUDY OF THE VEGETATION OF FOREST MASSIF OF SDAMAS.....	81
<i>Victor Kostenko, Olena Zavialova and Olga Chepak.</i> ECOLOGIC APPROACH TO THE RESTORATION PROCESS AT AREAS DEGRADED BY MINING OPERATIONS.....	82
<i>Nataliia Podpriatova, Iryna Klimkina and Hermann Heilmeyer.</i> STUDYING THE POSSIBILITY OF USING RED-BROWN CLAY FOR RECLAMATION OF COAL WASTE DUMPS.....	83
<i>Uliana Khromyak and Andrij Tarnavskyj.</i> REPEATING POLYETHYLENE DERIVATIVES OF THE LOW DENSE OF HRYBVOVITSKY DUMP.....	84

<i>Oleksandr Bereznyak and Mykola Kharytonov.</i> COST-EFFECTIVE TECHNOLOGY FOR HEAT POWER STATIONS ASHES PROCESSING AND UTILIZATION.....	85
<i>Vasyl Popovych and Andriy Voloshchyshyn.</i> THE IMPACT OF COAL WASTE HEAPS ON THE ENVIRONMENT OF SOKAL DISTRICT OF LVIV REGION.....	86
<i>Serhij Vambol, Viola Vambol, Oleksandr Kondratenko and Yana Suchikova.</i> IDENTIFICATION OF ORGANIC COMPONENTS OF SOLID WASTE ON SATELLITE IMAGERY WHILE MANAGING ENVIRONMENTAL SAFETY.....	87
<i>Yuriy Buchavyy and Vjacheslav Fedotov.</i> REMOTE-SENSING METHODS OF INDICATOR ESTIMATIONS OF GARDENING TERRITORIES PLACED BY MINING INDUSTRY WASTE.....	88
<i>Alona Derimova, Liliya Frolova, Oleg Kozhura and Mykola Kharytonov.</i> TECHNOLOGICAL AND ENVIRONMENTAL ASPECTS OF UTILIZATION OF HYDROLYSIC SULFURIC ACID OF PRODUCTION OF PIGMENT TITANIUM DIOXIDE.....	89
<i>Alexandr Valyaev and Vadim Korovin.</i> COMPARISON OF THE SOIL RADIOACTIVE AND HEAVY METALS POLLUTION WITH PHYSIOLOGICAL PARAMETERS OF TEST PLANTS AT THE FACILITIES OF SUKHACHEVSKY INDUSTRIAL SITE.....	90

Session 4.

OTHER ENVIRONMENTAL ASSESSMENT TECHNOLOGIES

IDENTIFICATION OF ORGANIC COMPONENTS OF SOLID WASTE ON SATELLITE IMAGERY WHILE MANAGING ENVIRONMENTAL SAFETY

Solid domestic wastes contain a components which can become nutrients for a pretty wide spectrum of types of microorganisms some of which are harmful for human and environment. The climate on territory of Ukraine promotes their intensive reproduction in such conditions. All organisms, including microorganisms, mainly consist of carbon and therefore represent the carbon containing components of waste dumps, namely organic. Monitoring of the conditions of microbiological pollution of urban systems on the territory of which surely there are solid waste dumps as part of technogenic and ecological safety of these systems, can take one of main places in ecological safety management systems.

Data of remote scanning of Earth (RSE) from the Space is such source of information, that allows to get an actual operative picture of places of location of illegal waste dumps with low time expenses. RSE methods in combination with Geo Information Systems (GIS) and methods of mathematical modeling provides possibilities for complex studying of sources of formation of ecological danger and making decisions about ways for handling them. For successful carrying out tasks of the study it is necessary to use Space images of ultrahigh spatial resolution (0.5 – 15 m) in spectral diapason 0.4 – 1.1 microns with spatial reference.

The present study was carried out for the example of Dergachi polygon of solid domestic waste in Kharkiv region. Results of the study shows that in this case using of universal method we can not allocate the solid waste dump on the general background of a Space image with acceptable accuracy because this task solves many errors of 1st kind. For the polygon implementation of allocation of presumable place of accumulation of waste was executed using a model that was based on analysis of statistical moments of different orders (average value, dispersion, asymmetry and excess) in accordance with following algorithm: a) finding of average number of pixels in specific part of image by the way of developing of its model in program Toolbox/Model maker using the command Focal Scan/Fokal Mean; b) marking on the image the sector of polygon that corresponds to selected model for calculation of average number of pixels; c) developing of model of dispersion in Focal Scan/ Focal Standard deviation and presenting it on picture and then selecting of diapason of values of dispersion using histograms; d) determination in accordance with histograms of required parameters for detection of zone of accumulation of waste and then allocation of areas of carbon containing materials and organic components of legal or illegal dumps from other components of landscape; e) loading of image in program Arc Map, creation of shape-files and classification, vectorization and calculation of value of area.

Thus, in present study a model was developed that is based on the method of exclusion («cutting-out») on image of sectors of dump with low degree of danger such as construction debris and rock masses. This model allows to allocate areas of carbon containing materials and organic components of legal or illegal dumps. That allows increasing of efficiency of implementation of ecological monitoring.

Key words: Ecological Safety; Earth Remote Scanning; Organic Pollution, Waste dumps; Space Image; GIS-Technologies
